

# Recessed Light Draft Stop Covers

Is your energy bill literally going through the roof?  
Are you planning on adding insulation in your attic?  
Are your light fixtures installed to the latest fire  
safety standards?  
Are your recessed lights draft proofed?

## THE SOLUTION

Go Green with the HERS Recessed Light Covers and start saving money on your energy bill.

The HERS Draft Stop Cover has been specifically designed to keep insulation away from recessed light, eliminating thermal loss through the light fixture.

The recessed light cap simply sits on top of the existing light and is compatible with sprayed foam, mineral wool, fiber

glass, blown-in cellulose, etc.

The durable and lightweight covers are easy to install and do not require additional tools, screws or sealants.
